

Sander Bell

Web & mobile developer specializing in clean designs, efficient code, and user-centered solutions

I'm proudly a React Native developer at Ling App , a mobile platform for learning languages. With two years of programming experience and over 15 years in communications, media management, and leading editorial roles, I understand the importance of creating concise code as well as seamless, user-centered experiences. I would be delighted if my skills and knowledge could help bring your ideas and projects to fruition.

Experience

Mobile App Developer · **Ling** · 2023 — Present

- ❖ Developing mobile UI and logic using React Native

Web Developer · **Freelance and Personal Projects** · 2022

- ❖ Developed a Vue.js application that enables users to count characters and words (somany.ch)
- ❖ Developed a React PWA for daily task management (should.today)
- ❖ Developed a browser extension used by dozens of people (rewords.app)
- ❖ Developed a user-friendly page for checking the air quality in Chiang Mai (cmair.today)

Editor-in-Chief, PR Executive · **Various Media Businesses** · 2008–2022

- ❖ Developed communication strategies and led copywriting teams
- ❖ Secured editorial placements and conducted media training as a freelance consultant
- ❖ Co-founded independent online media, achieving rapid audience growth
- ❖ Created/hosted independent radio and TV programs on IT and socio-political topics
