Summary

With two years of experience in programming and over 15 years in communications, media management, and leading editorial roles, I bring a wealth of expertise that seamlessly aligns with the profession of a web developer. Just as I meticulously curated content and guided communication strategies in my editorial positions, I now apply the same attention to detail in creating concise code and documentation. My master's degree in psychology, coupled with a course in UX design, equips me to craft intuitive, user-centered experiences.

Experience

Web Developer · **Freelance and Personal Projects** · 2023

- ❖ Developed a Vue.js application that enables users to count characters and words (somany.ch)
- ❖ Developed a React PWA for daily task management (should.today)
- ❖ Implemented modular React components to ensure maintainability and reusability (should.today)
- ❖ Utilized local storage and browser API for data persistence (rewords.app)
- ❖ Utilized async functions to fetch the latest AQI data from an API (cmair.today)
- ❖ Implemented caching to improve performance, ensuring a seamless UX (cmair.today)
- ❖ Leveraged MutationObserver to intelligently handle dynamically loaded content (rewords.app)
- ❖ Implemented various input validations to ensure no unexpected output (rewords.app)
- ❖ Developed the frontend for a real estate agent's website, focusing on creating an intuitive and visually appealing interface to enhance the UX
- ❖ Developed a backend script that enables the agent's customers to download pre-filled contracts for any specific property
- ❖ Utilized Git and Github for version control for all the projects

Editor-in-Chief, PR Executive · **Various Media Businesses** · 2008–2022

- ❖ Developed communication strategies and led copywriting teams
- ❖ Secured editorial placements and conducted media training as a freelance consultant
- ❖ Co-founded independent online media, achieving rapid audience growth
- ❖ Created/hosted independent radio and TV programs on IT and socio-political topics
